ICT CHEMISTRY

Adds color to your designs

YEAR	2007

01

Founded in 2007, our Ict Kimya San. and Tic. Ltd. Sti. firstly it produced organic dyes used in the decoration of glass ceramic and porcelain products. In the following times the demands from the customers and the needs of the sector have started the R & D studies of the line groups produced from the high degree of baked real Gold and Platinum and as of 2019 it has started production and sales.

02

ICT Chemistry , is one of the few companies in the world that produces organic dyes with colors produced from precious metals and aims to increase its market share every day.

03

To be a global producer of colors made up of precious metals.

ABOUT US

GLASS

GOLD AND PLATINUM

It is applied with a liquid gold and platinum brush that provides the eye-catching glow it gives to the glass.
It is suitable for oven regime with wide temperature range (540˚C – 610˚C).
It maintains its shine on the applied surface.

DIRECT PRINT

Direct printing gold by silk screen print method which can give all kinds of patterns to the glass provides a bright reflection and homogeneous image.

DECAL

It is sticked to the glass as a decal method which is applied to the decal paper with the silk screen printing method.
It preserves its appearance for a long time thanks to its brightness and dishwasher resistance.

LUSTER

Luster paints which form a thin colored line on the glass reflect a transparent and bright appearance on the surface.
It can be applied with a brush and spray gun. It is processed after it diluted at certain rates. There are different color alternatives.
It is has baking temperature between 550˚C - 600˚C degrees.

PORCELAIN AND CERAMIC

Our products which are specially formulated from precious metals for ceramic and porcelain products bring the most elegant look of gold and platinum to your designs on the applied surface. Our products which are applied in porcelain and ceramic kitchen tableware which are used extensively in daily life are suitable for decal brush and machine net works and show high performance against dishwasher resistance.

DECAL

It is the transfer of the graphics and pictures designed in the digital environment to the product by applying the silk screen method.
It is baked between 780℃- 860℃degrees.

BRUSH

Our gold platinum and copper gildings which we produce from precious metals applied with a brush on porcelain and ceramic products provide a lively bright and aesthetic appearance on the surface.
It is baked between 780℃- 860℃ degrees.

ORGANIC GLASS PAINTS

Due to its special resin structure formulated for kitchen and home decoration items made of glass which has an important place in our daily life. It is resistant to external impacts and is suitable for washing in the dishwasher besides its aesthetic appearance on the applied surface.
