

OUR ENVIRONMENTAL POLICY

As MAY LEATHER and its employees, it is our goal to produce environmentally friendly products within an environmental management system that complies with national and international legislation and regulations and is based on continuous development.

- To prevent pollution before it occurs, not to create danger, to reduce pollution at its source, to protect receiving environments with advanced technologies used, to apply recycling methods that contribute to the country's economy with processes that cause the least pollution,

- To evaluate and control environmental hazards and to continuously improve our environmental performance by developing projects on high-risk subjects,

- Transferring a clean and healthy environment to future generations

- Efficient use of energy and natural resources

- Reducing negative environmental impacts in all processes from production to the end of the life cycle

- Increasing environmental awareness of our employees and society

In this context, by managing our activities in an integrated manner with Quality and Occupational Health and Safety Management Systems, we are working with all our strength to become an exemplary organization with our environmental leadership in the leather manufacturing sector and to share our environmental performance with the relevant parties.
